Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what the “therefor” refers to at the end of claim 1.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Eis (6151874, cited by applicant).

Eis discloses:

cl. 1, 8, 13:

as the applicant indicated, all the elements recited prior to the “improvement comprising” is known (Applicant Admitted Prior Art), the improvement comprising:
a header lift & flotation system including:

left & right cylinders (6 & 11, on either side of the header attachment)
interconnecting the frame & the header at first & second points (fig 1);
fluid reservoir (40)
substantially independent left & right circuits (fig 3-5; col. 5, ln 52-55)
including valves (36, 37);
manually manipulated switches (col. 30-40, by the operator);
controller (30);

cl. 2, 9, 14:

hydraulic pump & accumulator (34, 35);

cl. 3-4, 10, 15:

Art Unit: 3671

switch, inherently rocker switch, on the operator's platform (col. 6, ln 39-40);

cl. 5-6, 11, 16:

as described in col. 6, ln 33-67 & continues in col. 7, ln 1-21, the switches used by the operator to control the accumulators via valves allows oil to flow or stop depending on adjusting the header closer or farther from the ground;

cl. 7, 12, 17:

as shown in fig 3-5, the switches have to operate independently, since they control either the left or the right storage devices.

Priority

4. This application repeats a substantial portion of prior Application No. 10/822,464, filed 4/12/2004 (now patent number 6901729), and adds and claims additional disclosure not presented in the prior application. Since this application names an inventor or inventors named in the prior application, it may constitute a continuation-in-part of the prior application. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

5. In the first paragraph of the Specification, it should be indicated that Application 10/814,409 has been Abandoned on 3/31/2004.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oni, Baker.
